PREFACE.

THIS work, like the Author's HEBREW and GREEK DICTIONARIES, although specially intended as a companion to his EXHAUSTIVE CONCORDANCE, has an independent value and usefulness, inasmuch as there is as yet published no other Concordance to the whole of the recent Anglo-American Revised Version of the Sacred Scriptures. The two that have already been issued cover the New Testament only, and neither of them takes adequate, if any, notice of the final dissent of the American Revisers from many of the changes adopted by the British Revisers. Moreover, both of them differ entirely from the present work in their plan, particularly in the features stated below.

The object of this Concordance is not to exhibit in full the readings of the Revised Version merely, for, with any good Concordance of the Authorized Version at hand, especially the Author's, this would be a superfluous task, inasmuch as the two Versions differ in comparatively few places, and even there usually in a single word. By showing these changes only or chiefly, the present work has brought the entire subject within a moderate space, and renders more distinct the real points of interest. Nor is it of so great importance to present these changes under the headings of the Revised Version as under those of the Authorized, inasmuch as the latter are far more familiar and constantly used. Scarcely any reader of the Scriptures, at least in the generation now living, would search out a passage by means of the new Version, while all are more or less concerned in knowing how far and wherein it differs from the old one. This they might ascertain, with reference to particular passages, by directly comparing the two texts under them, but it would be difficult, if not impossible, for them thus to discover all or most of the places where similiar or other changes have been made with regard to the same or corresponding words. The present Concordance gives a conspectus of such variations in all important cases, and that in both directions, i. e., from the Authorized to the Revised Version, and the reverse likewise. This enables any one to test the uniformity of the variations, and in this way their reason and their value may be more properly judged of, especially if the meaning of the corresponding words in the original languages is ascertained, as may most conveniently be done by consulting the HEBREW and GREEK DICTIONARIES accompanying the present work, which are adapted to the learned and the unlearned alike.

For these purposes, however, it has not been thought worth while to include all the minute changes, such as differences in mere orthography, punctuation, the order of words, and unimportant particles in many passages, where the meaning is not materially affected. The reader can easily remedy for himself any slight omissions, ambiguities, or discrepancies thus resulting, by directly comparing in detail the printed editions of the two Versions. Especially with regard to the American variations, some degree of incompleteness and imprecision was inevitable, in the absence of any published copy authoritatively exhibiting them actually incorporated into the text. Occasionally, the Author has been compelled to rely upon his personal knowledge as a member of the American Revision Committee.

A feature of noteworthy importance in the present work is the indication of those changes in the rendering that are due to the adoption of different readings in the original text by the translators. Through lack of the slightest indication of this in any edition of the Revised Version, ordinary readers are totally at a loss to perceive the propriety or even possibility of many of the changes made.

This Concordance, like all the other portions of the general work with which it is connected, has been prepared, not from pre-existing compilations of a similar kind, but from a fresh and independent examination of the texts themselves.

EXPLANATIONS

1. Under each word are set down only the passages in which the text of the Revised Version has a different word (or different words) from that (or those) of the Authorized Version; and the substitute or alternate word (or words) alone is (or are) given.

2. Under each heading (whether of the leading word simply or the same in combination with adjuncts as a phrase), immediately following the list of passages where the change as above occurs, are given (the same heading being repeated, but distinguished as below) conversely the passages in which the Revised Version has the same word (or words) for any different one (or ones) in the Authorized Version; and the word (or words) for which it (or they) is (or are) substituted is (or are) set down in like manner as above.

3. The relative order in which these modifications of the leading word occur, as sub-headings, is as follows: first, the leading word simply (which is everywhere printed in **Clarendon** or heavy-faced type); next, the leading word accompanied by any qualifying word (or words) *after* it, in the alphabetical order of these latter (which are printed in *italics*); lastly, the leading word accompanied by any qualifying word (or words) *before* it (or both before and after it), in corresponding alphabetical order (and similar type).

4. In every list, the omission of the leading word in an alternative passage is expressed by a long dash (——); and the condensation, by omitting intervening words *not* changed, is shown by three consecutive points (. . .).

5. The following signs are used:

An asterisk (*) indicates a different rendering (from that of the A. V.) adopted in that place by both the British and American Revisers.

An obelisk (†) indicates a rendering adopted by the British Revisers only.

A double obelisk (‡) indicates a rendering adopted by the American Revisers only.

Parallels (‖) indicate a change occasioned by the adoption of a different reading in the original (Hebrew or Greek) text.

A superior figure ($^{1, 2, 3,}$ etc.) indicates that the same change occurs a corresponding number of times in the same verse.

A superior letter ($^{a, b, c,}$ etc.) indicates that the change in question is made in the first, second, or third (etc.) occurrence of the leading word (or phrase) in the same verse.

6. The abbreviations of the names of the books of the Bible are the same as in the MAIN CONCORDANCE, namely:
